

- 1 Design document goes to EF for experiment
- 2 Design document goes directly to staging area (not used in conducting the experiment)
- 3 Experiment creates files. A subset of those are sent to staging.
- 4 Some files are pre-processed with a module. Tool may be available to run, or it may be just metadata.
- 5 Some files are analyzed with a module (similar to 4)
- 6 Document goes from design directly to archival or publication.
- 7 Documents can be added at any stage
- 8 Modules for computing, processing, etc.
